Session Details

Tuesday, April 29, 2025

Pre-Conference Program on Cybersecurity - An in-depth session on the latest trends in cybersecurity, the convergence of cyber and physical security, and how these changes are reshaping security operations and strategies. Independent registration required.

Please note: independent registration required to participate

Wednesday, April 30, 2025

The Security Experts use of the “Standard of Care” from the Intake of a Case to the Final Verdict with Mike Haggard - Learn how security experts apply the Standard of Care in negligent security cases using real case examples to develop opinions, avoid Daubert challenges, and communicate effectively with judges and juries.

Securing Large Scale Projects: Lessons, Challenges, and Stakeholder Alignment with Thomas J. (TJ) McComas - Explore key insights from a public-private partnership project, focusing on security system scope, stakeholder buy-in, and the importance of collaboration and communication for successful delivery.

De-escalation and Situational Awareness with Doug Simpson - Gain insight into effective de-escalation strategies and situational awareness techniques that consultants can use to guide clients. Interactive discussion in managing conflicts and responding to high-stress situations, promoting safety and preventing escalation.

Body Worn Cameras in proprietary Security: A gaming operators case study on implementing a BWC program with Eric Golebiewski - Gain insights from a case study on implementing a Body Worn Camera program in proprietary security, featuring strategies for effective deployment and integration.

Thursday, May 1, 2025

Building Effective Security and Emergency Preparedness Programs: Foundations, Collaboration, and Sustainability for Security Professionals with Dr. Stephen Bayne - Learn how to build collaborative, sustainable, and realistic security and emergency preparedness programs for effective response and recovery.

Navigating Security Challenges in Cloud Video Applications - Cloud video applications pose new challenges for security professionals. When video is stored in the cloud, security experts must consider data protection, the feasibility of transferring video off-premises, and contract management.

Business Development trends, tips, and tools: Artificial intelligence, knowledge management, and more – Presented by Frank Pisciotta on Knowledge Management, Kelly Stewart on AI and Knowledge Management, Drew Neckar on Business Development & Social Media Presence, moderated by Ken Wheatley.

Forensic Methodology – The Gold Standard for Expert Witnesses with Steve Kaufer - Learn how to use the IAPSC’s Forensic Methodology to enhance credibility, defend opinions, and reduce Daubert challenges in security-related litigation.

If interested in participating in this year’s conference, please contact us at iapsc@iapsc.org or our website iapsc.org for more details!
